

Vital tri-sign - VMS Profile

intelligent

Traffic &
Transportation
Solutions

Active throughout over **70** countries worldwide and still rotating after many years, even decades.

The **Vital Tri-Sign** is a rotating prism, variable messaging sign. Precision built to meet the requirements of the Traffic and Transportation Sector.

Highways Agency (HA) Approved, the '**Tri-Sign**' delivers a minimum of 3 x the impact of any standard road safety sign and is **Best in Class** within the VMS product market.

Benefiting from its multiple prism design and unique minimum friction, self-lubricating drive system.

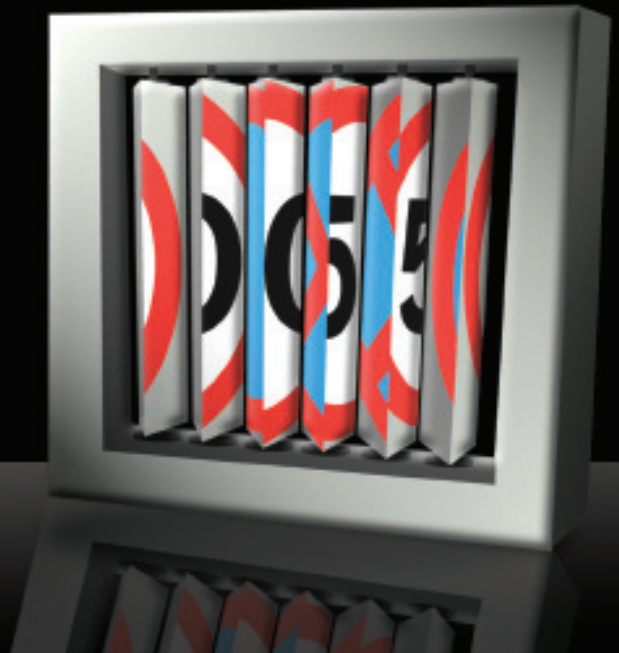

The Tri-Sign is primarily manufactured from rich aluminium, for its maximum strength and minimum weight qualities.

On road networks, sign faces are offered in **CR2**, **Micro Prismatic** or **Non Reflective** finishes and have interfaces for NMCS2 or UTMC and optional Wig Wags operation.

Control options for the Vital Tri-Sign are universal, thanks to its open software architecture, thus allowing immediate operation via wired and wireless connectivity.

Deployed & Utilised:-

- Toll Booth Status
